How Marketing and Designers work with us

Marketing agencies and freelance designers sign in to Meridian as **Guests**. They see only the projects, tasks and meetings they are added to. They are not employees, so they are left out of the org chart, payroll, leave and KPI, and their tasks carry no points.

Ellie HR · sets up partners	**Wong Wei Yee** PM · Corporate Site Revamp	**Nicholas** PM · Kopi Loyalty App
Mei Ling Guest · Bright Spark Marketing	**Aaron Tan** Guest · Pixelfold Studio (designer)	

Set up the partner

Done once per partner by HR, then per project by the project manager.

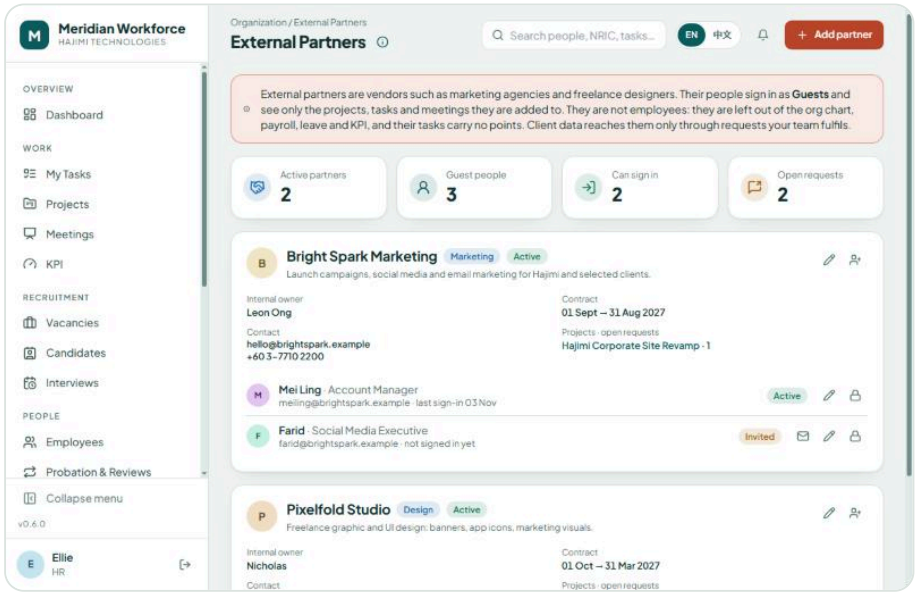

Step 1 of 3

HR · Ellie

Add the partner company

Go to **Organization → External Partners** and click **Add partner**. Enter the type (Marketing, Design…), contract dates and the internal owner who manages the relationship.

Each card shows the partner's people, whether they can sign in, their projects and any open requests.

External Partners: each partner, its people, and who can sign in.

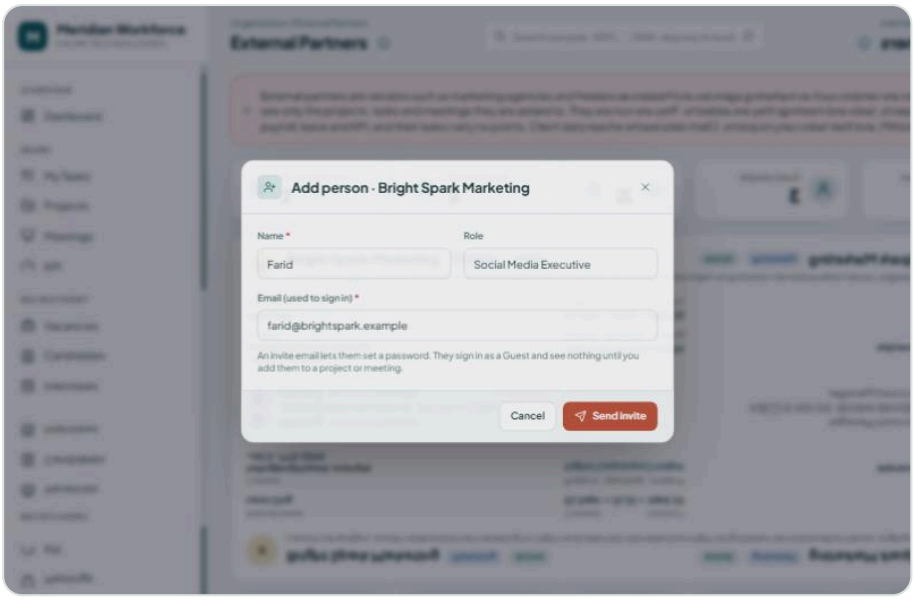

Step 2 of 3

HR · Ellie

Invite each person

Click the **add person** icon on the partner's card. Enter their name, role and email, then click **Send invite**.

They get an email to set a password. Until they are added to a project or meeting, they see nothing.

Inviting Farid, Social Media Executive at Bright Spark.

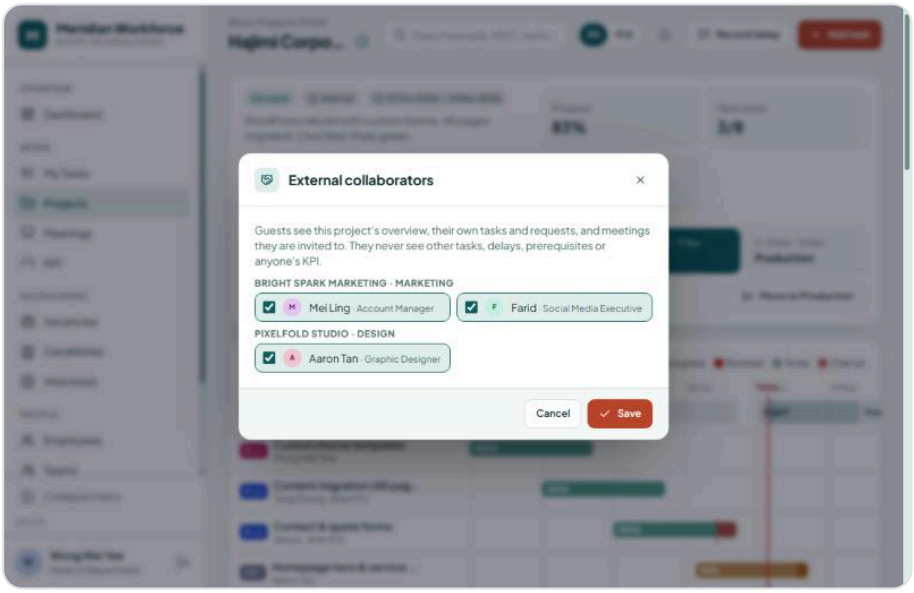

Step 3 of 3

PM · Wong Wei Yee

Add them to the project

On the project page, click the **handshake** icon next to **External**. Tick the partner people who work on this project.

This is what gives a guest access. Removing them here takes the project away from their view.

External collaborators on Hajimi Corporate Site Revamp.

Marketing: getting client figures

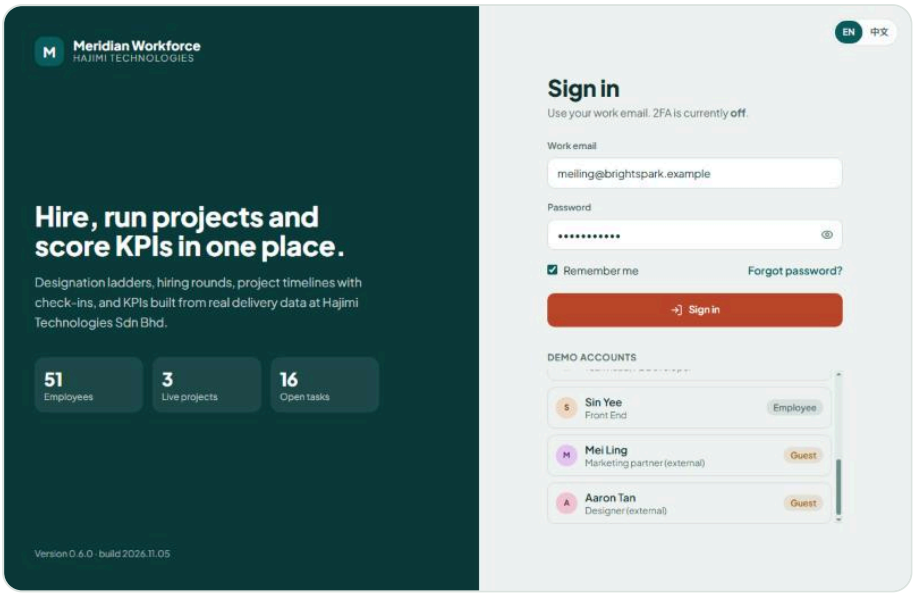

Mei Ling plans the launch campaign. She needs lead numbers she cannot see herself, so she asks for them. The figures arrive as a file on her request.

Step 1 of 6

Guest · Mei Ling

Sign in

She signs in with the email she was invited with. Her account is marked **Guest**.

Guest accounts on the sign-in page (demo list).

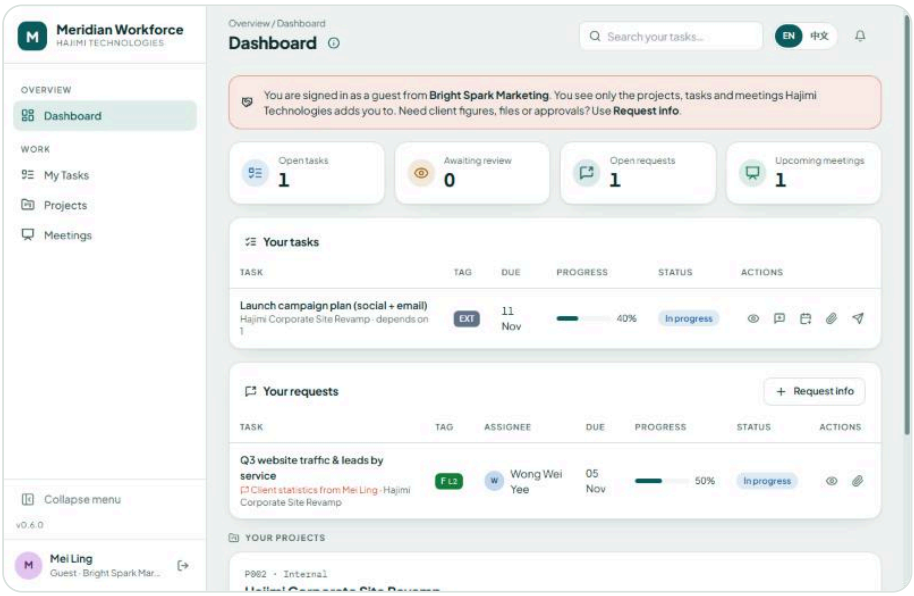

Step 2 of 6

Guest · Mei Ling

See only her own work

Her menu has just Dashboard, My Tasks, Projects and Meetings. The dashboard shows her tasks, her requests, her projects and upcoming meetings.

Her campaign plan waits on the Q3 figures, so it shows “depends on 1”.

Mei Ling's dashboard. EXT marks a partner task with no points.

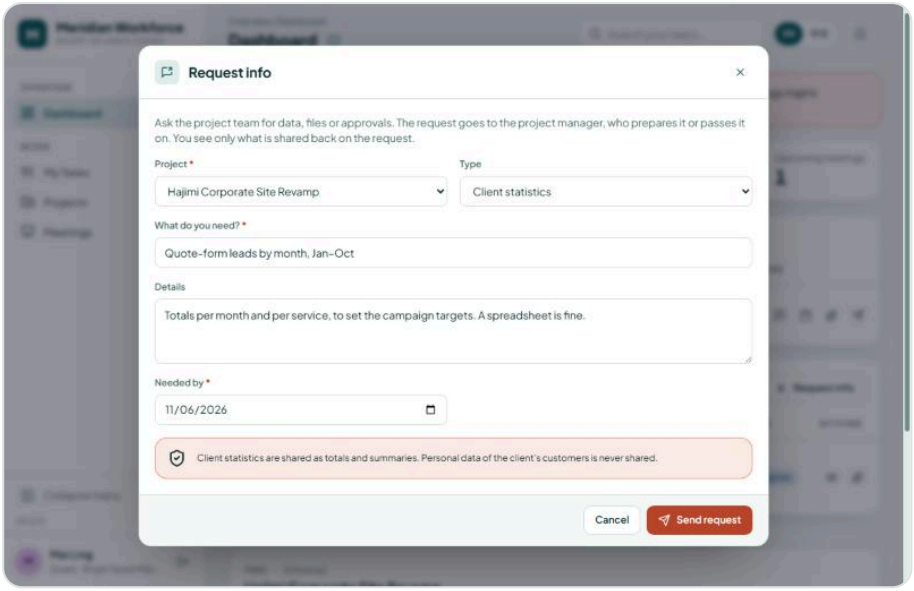

Step 3 of 6

Guest · Mei Ling

Request the client statistics

She clicks **Request info**, picks the project and the type **Client statistics**, says what she needs and by when, then clicks **Send request**.

The form reminds her that client figures come as totals and summaries only.

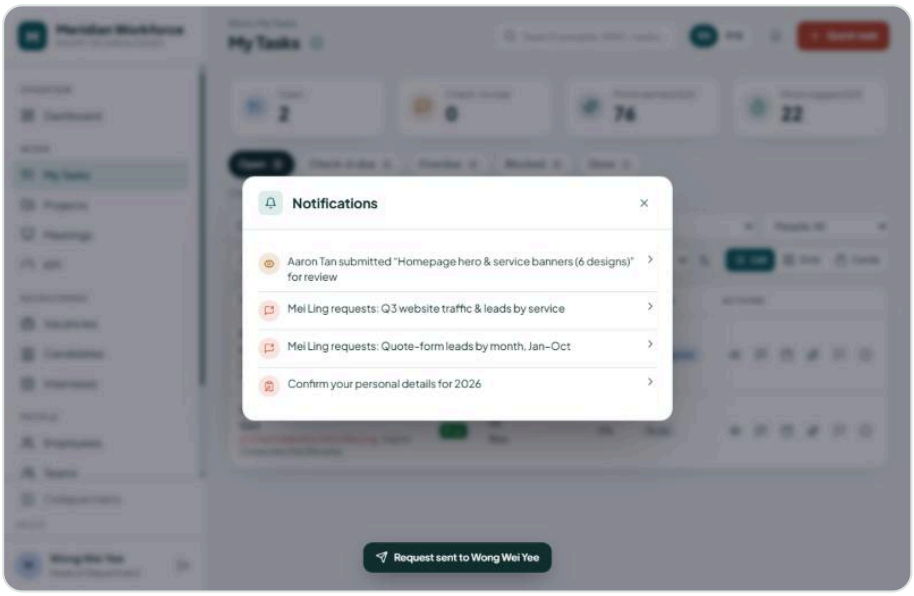

The request goes to the project manager.

Step 4 of 6

PM · Wong Wei Yee

The PM is notified

The request lands in Wei Yee's **My Tasks** and notifications as an ordinary task. She prepares the figures herself or gets them from whoever has the data.

Partner requests and reviews in the PM's notifications.

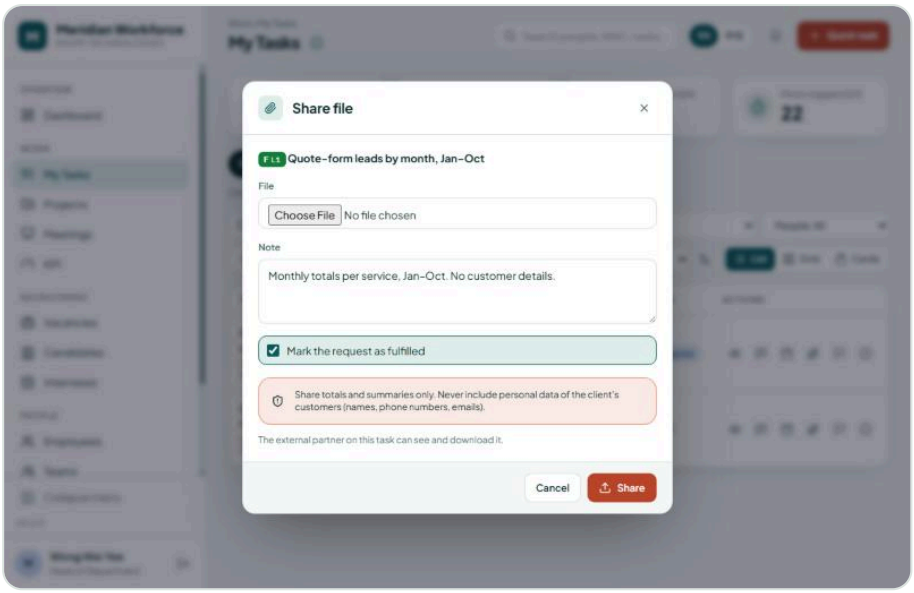

Step 5 of 6

PM · Wong Wei Yee

Share the file and close the request

She clicks **Share file with requester**, attaches the spreadsheet and adds a note. Leaving **Mark the request as fulfilled** ticked closes it.

A warning reminds staff never to include personal data of the client's customers.

Only what is shared here reaches the partner.

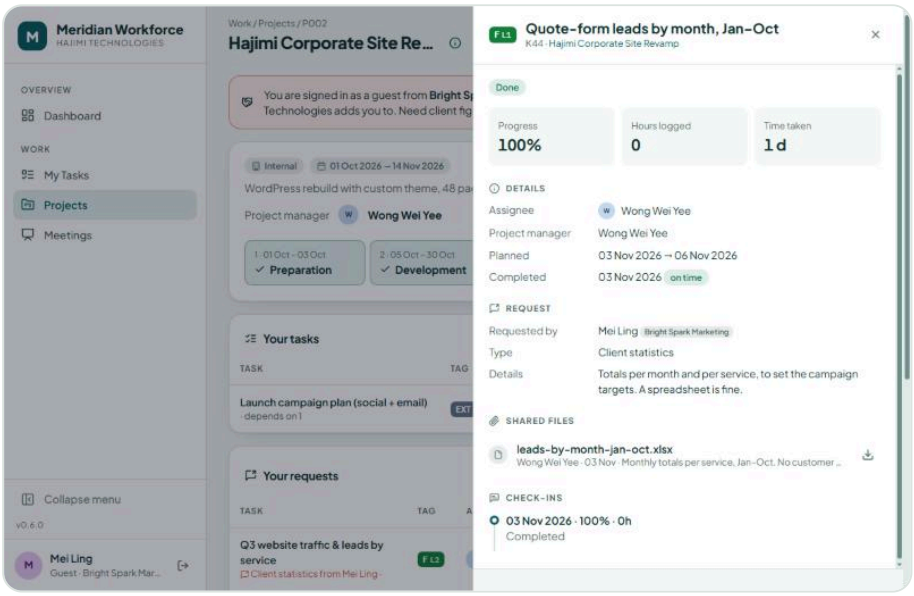

Step 6 of 6

Guest · Mei Ling

She downloads the figures

The request shows **Done** with the file under **Shared files**. Her campaign task is now unblocked.

Guests do not see internal points or reporting lines on the task.

The fulfilled request, seen by Mei Ling.

Designer: delivering artwork

Aaron designs the Kopi Loyalty card. He gets the brief as a task, uploads his files, and the project manager approves them.

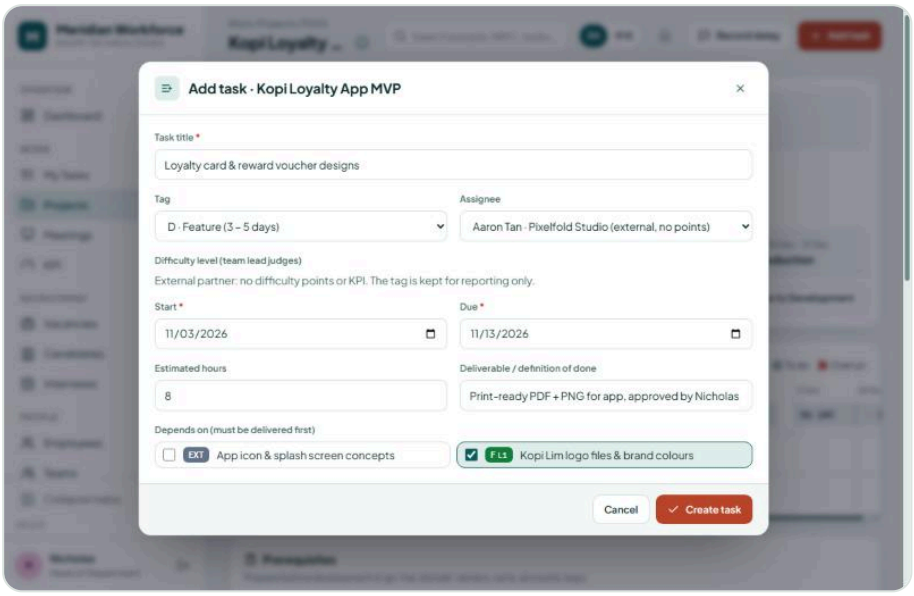

Step 1 of 5

PM · Nicholas

Assign the design task

On the project, **Add task** lists partner people in the **Assignee** menu as “external, no points”. Write the definition of done and link anything he needs first.

Here the design waits on the client's logo files, which Aaron requested himself.

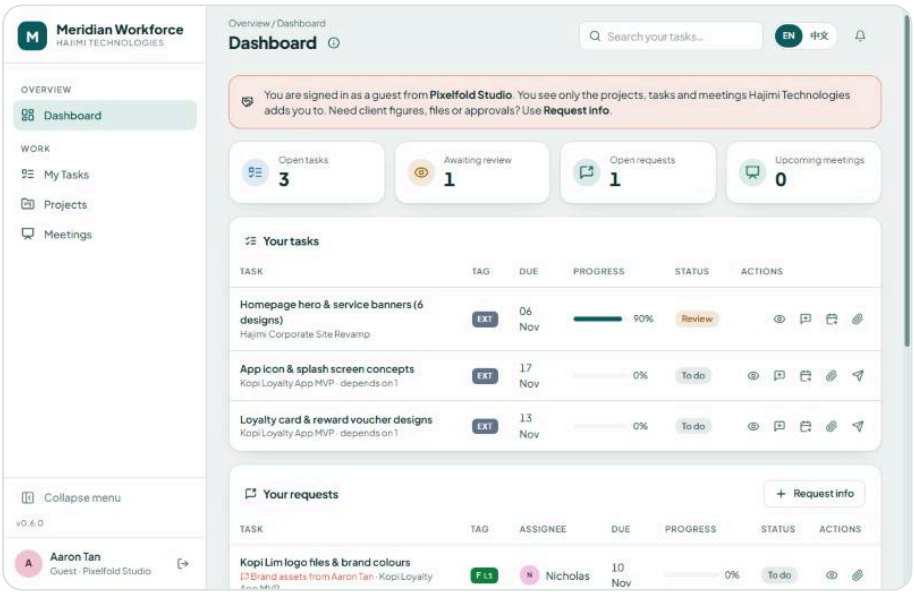

No difficulty points are shown for an external assignee.

Step 2 of 5

Guest · Aaron Tan

He sees his brief

Aaron's dashboard lists his three design tasks and his request for the client's brand files.

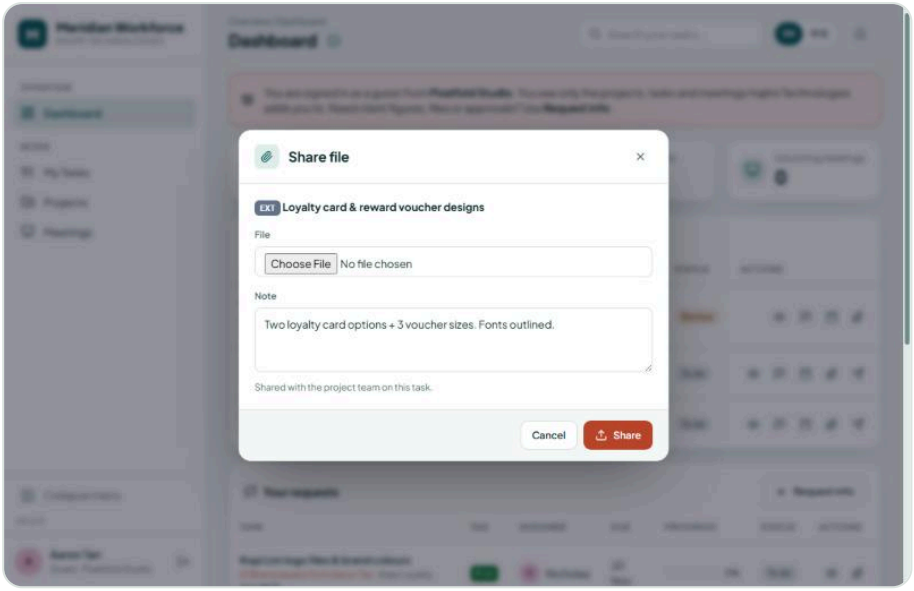

Aaron's dashboard across two projects.

Step 3 of 5

Guest · Aaron Tan

Upload the designs

He clicks **Share file** on the task, attaches the artwork and notes what changed.

Files are shared with the project team on this task only.

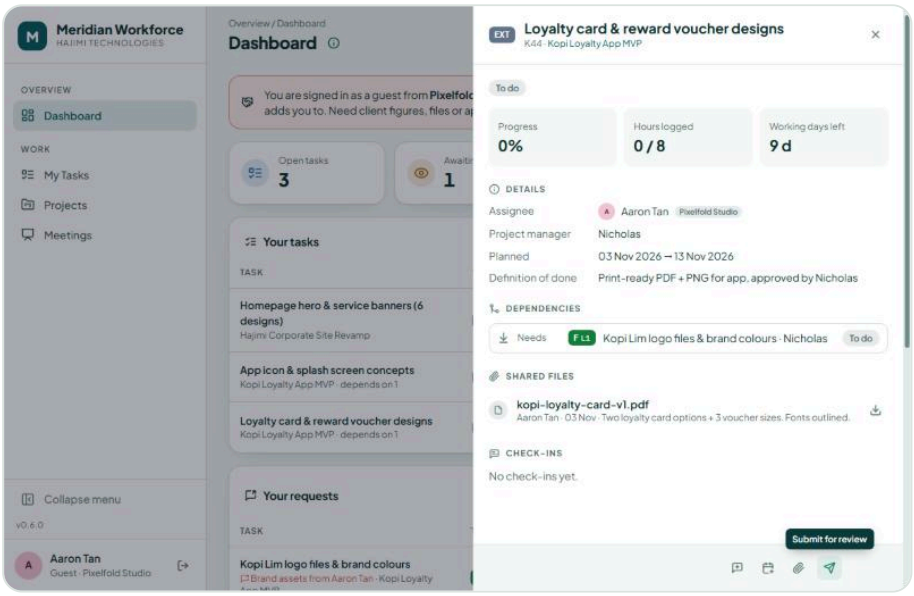

Step 4 of 5

Guest · Aaron Tan

Submit for review

When the files are ready, he clicks **Submit for review**. The task moves to Review and the PM is notified.

Partners never mark their own work complete. The PM decides.

The task with its shared file, ready to submit.

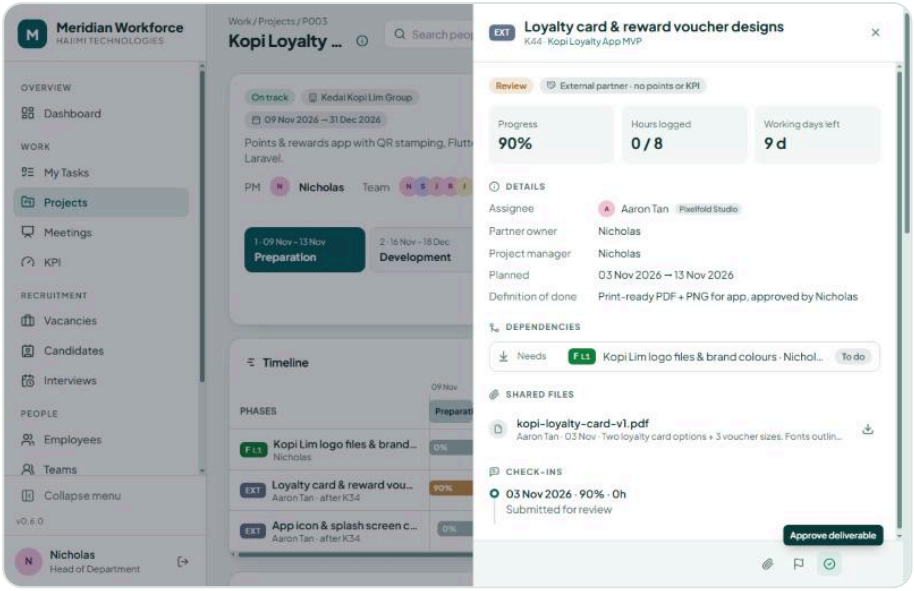

Step 5 of 5

PM · Nicholas

Approve the design

Nicholas opens the files and clicks **Approve deliverable**. The task is marked done.

Late delivery is still traced as a delay, but it never touches anyone's KPI. A “Request changes” button that sends the work back is not in the mockup yet.

The PM's view of the submitted design.

What guests never see

- Employees, the org chart, teams, payroll, leave, KPI or recruitment.
- Projects they are not added to, or other people's tasks on their projects.
- Delays, prerequisites, the activity log, points or reporting lines.
- Raw client data. Figures reach them only as files the team shares on a request.

Screenshots from the HTML mockup (docs/design/meridian-mockup.html) with demo data. Partner names and emails are fictional.
