Chosen direction: Atlas layout with Straits colours

Decided November 2026
Replaces the five options circulated earlier

THE DECISION

One fixed look for every client install: the Atlas layout (slim icon rail, greeting band, rounded cards) in the Straits colour scheme (teal, deep teal, coral). Users no longer switch between themes; each client can still set its own logo.

WHY

Atlas gives the content the most room and works best on tablets and phones; Straits keeps it formal and calm, with coral reserved for what needs action.

TYPEFACES

Plus Jakarta Sans for all text · IBM Plex Mono for codes and figures where alignment matters.

PALETTE

Teal (brand)	Deep teal	Coral (action)	Mist (ground)	Ink
#0B5D5E	#0B3B3B	#B9452B	#EFF4F3	#12302F

DESIGN RULES

How the colours and shapes are used

Role	Colour	Used for
Brand / structure	Teal #0B5D5E	Logo, active menu item, links, focus ring, icons, selected states
Emphasis surface	Deep teal #0B3B3B	Greeting band, login panel, tooltips
Action / attention	Coral #B9452B (fill), #D9583B (highlight)	Primary buttons ("New check-in", "Save"), attention badges. Never for decoration
Background	Mist #EFF4F3, surface #FFFFFF, subtle #F4F8F7	Page ground, cards, table headers and row hover
Text	Ink #12302F, muted #4F6E6C	Body and headings; secondary text (both pass WCAG AA on white)
Lines	#D6E2E0, strong #9DB7B3	Card borders, dividers, inputs
Status	OK #0F7A5C · Warning #A8620A · Danger #C2372D · Info #1F6FB2	Chips and badges, always with a text label, never colour alone

LAYOUT

84 px icon rail with tooltips on desktop; it becomes a slide-out menu below 1024 px. Top bar with page title, search and actions. Content in rounded cards (16 px radius; 20 px for the greeting band).

INTERACTION

Buttons and inputs 38 px tall on desktop; touch targets at least 44 px in the production app. One coral primary button per screen area; secondary actions are white and turn light teal on hover.

ACCESSIBILITY

Text meets WCAG 2.2 AA contrast. Status is shown with a label as well as colour. Icon-only buttons always have a tooltip and an accessible name.

Reference files: the clickable HTML mockup (docs/design/meridian-mockup.html) shows every screen in this design; the design canvas holds the source artboard.
